The mission, objectives and priorities of the University's internationalization

The strategic goal of Turan-Astana University (TAU) is to consolidate its leading positions in Kazakhstan and achieve brand recognition among foreign applicants in providing world-class scientific and educational services in the interests of innovative socio-economic development of the country, primarily in the development of international cooperation. The internationalization strategy has largely determined the mission of Turan-Astana University and its goals for the future.

This Internationalization Strategy is included in the Development Program (Strategy) of Turan-Astana University for 2024-2029, which was approved by the decision of the University Academic Council (Protocol No. 5 dated 24.12.2024).

The internationalization strategy of Turan-Astana University is designed to facilitate the implementation of one of the main tasks facing the University in 2024-2029 – the development of international cooperation.

The university's mission as a leading university in the industry is to carry out educational and research activities aimed at training specialists with higher education and highly qualified scientific personnel capable of perceiving, generating and embodying innovative ideas, creating competitive, high-tech products in the field of digital economy, law, and information systems.

TAU development priorities:

- 1. In the field of internationalization of education:
- systematic implementation of the tools of the European Higher Education Area in the university's educational process;
 - 2. In the field of internationalization of scientific research:
- involvement of teachers, doctoral students, undergraduates and students in scientific research, ensuring their wide participation in scientific project competitions of domestic and foreign foundations and organizations;
- increasing scientometric indicators of scientific activity by increasing the number of publications in high-impact scientific journals.
 - 3. In the field of international cooperation development:
 - increasing the university's recognition in the international market;
- development of the university's degree of internationalization in the field of education and scientific research;
- an increase in the volume of exports of educational services, as well as scientific products and services;
 - improvement of the University's international management system.

The internationalization of TAU should be understood as the process of integrating higher education into the international educational community, through the use of a specific set of components, which includes exchange programs for students, teachers, and researchers between subjects of the global educational community (training, internships); the development and implementation of unified curricula that meet international standards; the involvement of teaching staff in the global labor market, the activation of participation in various international conferences, forums,

competitions; the development of intercultural relations; increased publication activity in foreign publications for all members of the educational community; increased opportunities for obtaining grants from foreign organizations and other forms that can be formed in the context of integration and globalization, as well as expanding the capabilities of countries participating in the global economy, taking into account all subjects of the education system (universities, schools, colleges, etc.).

The main forms of internationalization of TAU include:

- joint and double-degree programs with foreign partner universities in the framework of the educational process;
 - implementation of joint research projects;
 - development of curricula that meet international standards;
 - academic exchange of students;
 - academic mobility of the teaching staff;
 - language programs for international students;
 - inviting foreign scientists to give a course of lectures;
 - implementation of educational programs in a foreign language;
- participation in internships for students, undergraduates, and doctoral students;
 - participation in teaching staff internships;
 - organization and participation in scientific research events;
- organization and participation in summer and winter schools (including joint ones) both students and teachers;
- participation in international and regional educational exhibitions, organizations, foundations, projects (DAAD, AIESEC, etc.);
 - work of the teaching staff within the framework of international grants;
 - expansion of publication activity in foreign publications.

The Internationalization Strategy of Turan-Astana University for 2024-2029

п	Sections and events	Compl etion	Responsible persons	Expected result	
		dates			
			on of education		
1	Optimization of educational programs and areas of training for specialists with higher education				
1.1	Expanding the number of educational programs in English at all faculties	2024- 2029	First Provost, Provost for Internationalization, Infrastructure and Marketing	Bachelor's and Master's degree programs in English
