Program Goal:	Improving the system of educational work at Turan -Astana University, developing a system of measures for purposeful formation of a holistic, physically and spiritually developed personality of a student of Turan-Astana University, who has a high level of patriotic consciousness, a sense of pride in their country and university, humane and tolerant, ready for innovative transformations in all spheres of society.
Program Objectives:	<ul style="list-style-type: none">- create organizational prerequisites for strengthening educational work at the university on the basis of defining its goals, objectives, and directions;- determine the role and place of university departments in the implementation of the set goals and objectives of educational work;- to ensure the implementation of educational work at the university on the basis of coordinated interaction of all its subjects;- to help strengthen the motivation of students to participate in the social and cultural life of the university, self-development;- develop a set of measures to strengthen patriotic education, the formation of humanistic values among students;- determine the mechanisms of implementation of educational work at the University "Turan-Astana";- develop a system for evaluating the effectiveness of educational work at Turan-Astana University;

	<ul style="list-style-type: none"> - develop a plan of educational work at Turan-Astana University in accordance with the main directions of education of students of Turan-Astana University for 2024-2025 academic years;
Implementation period:	2024-2027 academic years
Expected results:	<ul style="list-style-type: none"> - during the implementation of the Program, organizational prerequisites will be created for strengthening educational work at the university based on determining its goals, tasks, and directions; -optimal psychological, pedagogical, organizational, managerial, and resource conditions will be provided for the formation and development of the personality of a student of Turan-Astana University who has a high level of spiritual, physical, intellectual, and social development. cultural and creative development, patriotic, tolerant, socially active; - strengthening of educational work at the university will be ensured on the basis of coordinated interaction of all its subjects – collective and individual; - conditions will be provided for self-realization and strengthening students ' motivation to participate in the social and cultural life of the university, self-development; - a set of measures will be developed to strengthen patriotic education and develop humanistic values among students; - all mechanisms of implementation of educational work at the University "Turan-Astana" will be involved; -the effectiveness of educational work at Turan-Astana University will be determined based on the developed assessment system;

Introduction

The fundamental changes that have taken place in the country, which have determined a new vector of development of the Republic of Kazakhstan, are accompanied by radical changes in the socio-economic, political and spiritual spheres of society and the consciousness of its citizens, innovative transformations in the higher education system.

The transition to an innovative development path is primarily associated with large-scale investments in human capital. The future of the state and its success largely depend on the education and health of young people, their desire for self-improvement and the use of their skills and talents in life and professional activities.

Under these conditions, the need to develop goals, objectives and strategic priorities for the development of the educational potential of the university has sharply increased.

Turan-Astana University, as one of the leading universities in the humanities and economics of Kazakhstan, has a huge educational potential, which requires its implementation in educating students in the spirit of citizenship, patriotism, commitment to the ideas of active

progressive development of our country, outlined in official documents of the Ministry of Science and Higher Education of the Republic of Kazakhstan.

The Educational Work Program at Turan-Astana University is designed to provide a renewed impetus to the formation of the student's personality on the basis of humanistic values, as well as to promote the spiritual, physical, and moral-cultural development of youth in the context of implementing the concept of « Tolyq Adam».

General provisions

The program of educational work at Turan-Astana University (hereinafter referred to as the Program) is a document reflecting the system of ideas about strategic goals and priorities of the Program of educational work at the University for the 2024-2025 academic years, the most important directions, content, sequence, means and terms of implementation of these goals.

The Program formulates the purpose, objectives, principles, directions, content of the educational work program at Turan-Astana University, defines the role and place of university departments in organizing educational work with students and implementing its results.

The development of the Program was carried out within the framework of the implementation of legislative documents, normative acts – the Constitution of the Republic of Kazakhstan, the Law of the Republic of Kazakhstan: "On Education", "On state Youth Policy", the Concept of "Tolyk Adam" and is conditioned by the need to fulfill the main task

of education –creating the necessary conditions for obtaining education, formation, development and professional development of the individual in the based on national and universal values, achievements of science and practice.

The main idea of the Program is that educational work organized at Turan-Astana University systematically and purposefully, carried out in a special way organized educational space of the university under the control of the entire educational and upbringing environment and with direct personal motivation of students and teachers, is able to realize strategic goals and objectives of educating students.

The main goal of the Program is to improve the system of educational work at Turan-Astana University, to develop a system of measures for the purposeful formation of a holistic, physically and spiritually developed personality of a student of Turan-Astana University, who has a high level of patriotic consciousness, a sense of pride in their country and university, humane and tolerant, ready for innovative transformations in in all spheres of society.

The essence, purpose, tasks and principles of educational activity works at the University "Turan-Astana"

Education is one of the most important components of the educational process at the university.

Education in this Program is understood as a purposeful and systematic activity focused on the formation of the individual in accordance with the normative models in force in society; activities aimed both at the formation of socially significant qualities, attitudes and value orientations of the individual, and at creating favorable conditions for all-round harmonious moral, intellectual and physical development, self-improvement and creative self-realization personalities of the future specialist.

The essence and main mechanism of educational work at Turan-Astana University is to involve students in purposefully organized educational, research, labor, social, cultural and leisure, sports and recreation activities in order to form, develop and self-develop a person or individual personal qualities. At the same time, the educational impact on the personality of students is objectively exerted by the university environment as a whole.

The purpose of educational work at Turan-Astana University is to provide conditions for the formation and development of a spiritually and physically healthy, highly civic, patriotic, humanistically oriented, socially active, proactive, tolerant, creative personality with high moral and cultural needs, the personality of a young person of the 21st century, capable of innovative socio-cultural transformations.

Achieving the goal of educational work is carried out through solving **a set of tasks**.

The main task of educational work at Turan-Astana University is to create and support such an educational system and educational environment, which, under the control of the relevant bodies (departments and individual managers) and with direct motivation of students and teachers, will contribute to the orientation of students to continuous spiritual and creative personal development, self-development that provides for and unites in itself the following components: spirituality, physical health, professionalism, competitiveness, critical and unconventional thinking, cultural tolerance, active creative work, and many others.

The tasks of educational work at Turan-Astana University include creating conditions and a favorable social and pedagogical environment for:

- formation of socially significant civil and patriotic values, views and beliefs among students;
- strengthening the patriotic orientation of education, instilling a sense of pride, deep respect and reverence for the symbols of the state-the Coat of Arms, Flag, Anthem of the Republic of Kazakhstan;
- fostering respect for the historical past and cultural heritage of Kazakhstan;
- formation of the basics of socio –political literacy among students, education of students in the spirit of respect for the rule of law, the norms of public and collective life;
- formation of students ' corporate spirit, fostering a sense of unity with the university community, honoring, preserving and multiplying the historical and cultural traditions of Turan-Astana University, knowledge and respect for the Anthem, the Oath of students of Turan-Astana University;
- formation of racial, national and religious tolerance among students, development of friendly relations between peoples, tolerant attitude to the culture of peoples living in Kazakhstan, based on an explanation of the state language and ethnic policy;
- improving the cultural level of students on the basis of familiarization with the achievements of national and world art culture;
- formation of students 'needs and skills for a healthy lifestyle, prevention of antisocial behavior of students' youth;
- active counteraction to destructive manifestations, activation of work to combat religious extremism:
- students ' creative self-realization, self-management and more active involvement in solving social, cultural, legal, environmental and other problems.

Educational work at Turan-Astana University is carried out on the basis of the following **principles:**

- *the principle of systematic organization of educational work*, which involves purposeful and coordinated work of all departments of the university to educate students;
- *the principle of recognizing the priority of the interests and needs of students* as a special socio-demographic group, which implies not only taking into account the interests and needs of students in organizing educational work, but also the purposeful development of various interests and needs of students, their abilities and talents;
- *the principle of priority of patriotic education*, which provides for the organization of educational work in the direction of forming a patriotic, highly civil person who loves his Fatherland, knows and honors the symbols of the state, knows and respects the national history, traditions, culture;
- *the principle of continuity of generations of representatives of the university community* in the organization of educational work, providing for the opportunity to use such factors as the socially valuable experience of university veterans, teachers, employees, senior students, university graduates, cultivating a sense of pride in their country and their university, its history and traditions, a positive attitude to study, active participation in public life; social and cultural life, motivation of creative approach to performing various kinds of activities;
- *the principle of democratization of university life in general and educational work in particular, which presupposes a system of relations between all participants in the educational process, which is based on the constant expansion of the rights and powers, as well as the duties and responsibilities of all its subjects (administration, teaching and student collectives)*;
- *the principle of self-government and direct participation of students of the University of a "Turan-Astana" in the implementation of youth policy, in the social, cultural and sports life of the university*;
- *the principle of voluntary participation in various types of extracurricular activities*, which provides for the freedom to choose the type of activity, participate in the social and cultural life of the university in accordance with their interests and abilities;
- the principle of universality of the main directions of educational work, which consists in the ability to manage the education of students of various faculties and courses;
- the principle of cooperation with universities of the Republic of Kazakhstan, CIS countries and foreign countries on the education of students.

The principles of organizing educational work at Turan-Astana University are interrelated and implemented in unity, interconnection and interdependence. And only such a holistic, integrated approach to the organization of educational work at the university will allow forming the personality of a student who is aware of the need and social significance of the unity of their professional training and personal formation and growth, providing opportunities for future professional activities and building their career in a competitive and innovative development of the country.

Structure of educational work at "Turan-Astana" University

The system of educational work at Turan-Astana University is a set of structural, organizational and content elements that are closely related to each other and aimed at forming the personality of a new student, designed to actively participate in the implementation of the youth policy of the Republic of Kazakhstan.

**Implementation mechanisms
Educational work programs
in TAU**

Achieving a given level of efficiency and effectiveness of the functioning of the educational work system in TAU is carried out by a set of certain conditions and versatile technological and resource support.

Technological support of educational work in higher education institutions consists in choosing and implementing educational technology as a system of purposeful and consistent actions related to both the organization and management of the educational process based on a personality-oriented approach, direct impact on the student's personality to achieve the goals set, and indirect impact on the educational environment, optimal conditions for the formation and development of personality traits.

At the same time, the technology of educational work at TAU is based on humanistic pedagogy and implements the humanization of the entire educational environment and educational space of the university. Active participation of students in transformative activities, stimulating the interest and need of individuals to participate in management, implementation of specific initiatives, design and conduct of public-patriotic, cultural, leisure, sports and recreation events contributes to the formation and development of students' value orientations, skills of socially significant strategic goal setting, and the formation of themselves as an integral person with a high level of professional development., spiritual, moral and intellectual development.

Thus, the technology of educational work based on the student's active personality-oriented activity becomes an effective mechanism for implementing the Educational Work Program at TAU.

The implementation of the Educational Work Program at TAU requires appropriate resource support, the components of which are:

- *Normative and legal support* of educational work-legislative documents, normative acts regulating the educational and educational activities of the university;
- *Scientific and theoretical support* provides for the organization and conduct of scientific research on the problems of education in various social and humanitarian aspects, the use of scientifically based results in practical activities for the education of university students;
- *Pedagogical and methodological support*, including the development of a set of educational and special programs, methods, manuals and guidelines for the organization and conduct of educational work at the university, the use of all the variety of pedagogical forms and means, taking into account the characteristics of the student audience as a special category of youth;
- *Information support*, which provides for the active use of information technologies, mass media, and the Internet for receiving and posting information about educational work carried out at TAU;
- *Organizational and managerial support* that provides for optimal planning and design of educational work, coordination of all subjects of the educational process of the university;

- *Staffing* provides for the involvement of highly qualified management specialists in educational work as coordinators, representatives of the teaching staff as performers; a clear distribution of functional responsibilities of subjects of the educational process, the organization of training and advanced training of specialists who are able to effectively solve the tasks of educating students at the level of modern requirements;
- *Financial, economic and logistical support* provides for the calculation and allocation of financial resources, the development of the material and technical base and infrastructure of the university, its effective use for educational work with students.

The integrated use of this resource support will contribute to the maximum implementation of the educational work program at TAU, the implementation of strategic goals of professional-oriented, civil-patriotic, dukhov, intellectual and cultural education of students.

Expected results from Program implementations

As a result of the implementation of the Educational Work Program at TAU:

- optimal psychological, pedagogical, organizational, managerial, and resource conditions will be provided for the formation and development of the personality of a modern student with a high level of spiritual, physical, intellectual, cultural and creative development, the personality of a young citizen of the Republic of Kazakhstan, patriotic and humanistically oriented, creative and non-standard thinking, socially active, proactive, competitive, and professionally capable competently and personally interested in implementing the country's development goals, transforming the world around them;
- an effective system of work will be created to strengthen the civic and patriotic orientation of each student's education based on the formation of conscious pride, deep respect for the symbols of the state-the Coat of Arms, Flag, Anthem of the Republic of Kazakhstan, respect for the historical past and cultural heritage of Kazakhstan;
- a system of program activities will be developed to raise the level of corporate consciousness and spirit, form a sense of unity with the TAU community, honor, preserve and multiply the historical and cultural traditions of TAU;
- conditions will be provided for the formation of students ' needs for spiritual, moral, aesthetic, multicultural, and physical improvement based on a healthy lifestyle;
- will be provided for the formation of students ' needs for active counteraction to destructive manifestations;

- conditions will be provided for activating students ' creative initiatives and self-actualization, readiness for continuous self-education and self-development based on expanding student self-government and involving them in all spheres of life of TAU traditions;
- an effective system of scientific, educational, methodological, information and technological support for educational work in TAU will be realized;
- The work will be strengthened and mechanisms for monitoring the effectiveness of educational work in TAU will be improved.

System for evaluating the effectiveness of educational work in TAU

The management mechanism of the educational work system at TAU includes: analysis, assessment, forecasting, design and modeling of the state of the process of educating students at TAU, taking into account the trend of social development, defining and setting strategic tasks for educational activities of the university and its direction, scientifically based planning of educational work in general and its individual areas, selection and placement of personnel with a clear distribution of functional responsibilities of departments and individual employees engaged in educational work at TAU, scientific organization of labor and resource support for subjects of the educational process. Systematic monitoring of the state, effectiveness and effectiveness of educational work, development of preventive measures and timely adjustment of the system of educational programs.

Assessment of the effectiveness of educational work is carried out on the basis of using a system of objective criteria.

To assess the effectiveness of educational work in TAU schools, the following criteria have been developed:

1. Stability and clarity of work of all levels of the educational work system at the university
2. The degree of legal, psychological and pedagogical readiness of subjects of the educational process
3. The level of formation of students ' knowledge of the state symbols of the Republic of Kazakhstan
4. Level of formation of patriotic consciousness
5. Level of legal consciousness formation
6. The level of formation of the need to participate in the social, cultural, sports life of TAU Mass participation of students in public, cultural, leisure, sports and recreation events
7. Effectiveness of students ' participation in intellectual, creative competitions, sports competitions
8. The level of formation of students ' needs to participate in student self-government bodies
9. The level of formation of students ' initiative, the need for independent search for new forms of extracurricular activities.

Conclusion

The theoretical position and practical recommendations set out in the Program of educational work in TAU schools for the 2024-2027 academic years are the basis for solving the most important tasks of educating students, increasing social activity in performing socially significant functions in various spheres of TAU life and society.

The program is focused on activating and improving the system of educational work at TAU, providing conditions for the introduction and implementation of practical activities to form a patriotic, socially active, spiritually, intellectually, highly qualified specialist who is able to solve professional problems at a high level, be a true citizen of his country, a person of culture of the XXI century.
